Bill Brittain Hamblen County Mayor 511 West Second North Street Morristown, TN 37814

Re:

Proposed Purchase of GFL Property

Dear Mr. Brittain:

Currently, the landfill operated by the Hamblen County-Morristown Solid Waste (HCMSW) Board at 3849 Sublett Road, Morristown, Tennessee has approximately twelve months of remaining life. The HCMSW Board has submitted an application to the State of Tennessee Department of Environment and Conservation (TDEC) for approval to expand two proposed phases which will provide an additional ten years of estimated life.

The HCMSW Board has also become aware of two adjacent properties owned by GFL which are available for sale as follows:

- a) A 16± acre tract which borders the northeast corner of the HCMSW landfill;
- b) A 55± acre Class 3 landfill that GFL operates east of the HCMSW landfill.

Based on engineering estimates, the 16± acre tract, once developed, could add an estimated twenty-one years of useful life. The Class 3 landfill would allow the diversion of demolition and other approved waste thereby lengthening the life of the landfill currently open and in use. Additionally, purchasing the Class 3 landfill from GFL would allow easier access to and expansion into an existing 55-acre tract already owned by the HCMSW landfill.

At its regular monthly meeting held on May 20, 2022, the HCMSW Board approved authorizing Hamblen County and the City of Morristown to pursue purchasing these properties subject to certain contingencies being met. Accordingly, it is requested that the governing bodies of Hamblen County and the City of Morristown approve and purchase these properties which will significantly extend the life of the landfill.

Respectfully submitted,

Tom Rush Board Chair

This is not a change order nor a directive to proceed with the work described herein. Please submit with the form below an itemized material cost and time proposal for the changes in the contract sum and contract time for the following proposed modification(s) to the contract:

**Description:** Please refer to attached correspondence related to remedial work required at dropouts discovered on the Level 1 basement.

As per review in field it was determined that the drop out located by the smaller yellow star on attached mark-up from contractor as part of RFI-048 (north west corner) was located near a storm line. The soft soil was removed to expose the underlying rock. Water was used to flush the seams or throat and flowable fill was used to backfill the excavated areas. Photos are attached.

The second drop out - if another drop out doesn't occur in the area, contractor can proofroll it at a later time and see if there is a need to excavate/repair it then. Right no remediation required.

Tayler,

The drop out located by the smaller yellow star (north west corner) was located near a storm line. The soft soil was removed to exposed the underlying rock. Water was used to flush the seams or throat and flowable fill was used to backfill the excavated areas. Photos are attached.

As for the larger one near the middle of the basement. Not much has been done to that one. Blaine and I decided to leave it alone (since March 15). Redstone has been washing out their grout lines in it. We put some of the left overflowable fill in it from the above repair. But last time I was there (on Monday). It was holding water in spots and Blaine had backfilled it with onsite soil.

I spoke to Blaine and told them if another drop out doesn't occur in the area, we can proofroll it at a later time and see if there is a need to excavate/repair it then.

Notification about RFI RFI-048 - Dropouts in Level 0 basement

### Question

There are two documented dropouts in the Level 0 basement area of the project. Owner, Architech, CM and geotech have all been notified a couple of times over the past two week. Please see attached for location of each (noted with yellow stars) and photo of the larger of the two. Per geotechnical, these will have to be remediated. Please advise.

Hamblen County Justice Center-Request for Additional Compensation Due to Extended Pre-construction Services

#### Dear Mayor Brittain:

Please find herein, BurWil's request for additional compensation for project manager services, due to the protracted length of pre-construction activities. BurWil requests that the Mayor review the following articles in our agreement between The Office of Hamblen County Mayor and BurWil Construction dated August 20, 2020. The following articles, of which pages are attached, are pertinent to this change request. Article 1.3.7, outlines the milestone schedule of the project and states that the commencement of construction was anticipated in January/February 2021. Article 1.6 states that information may materially change and the Owner and Project Manager shall appropriately adjust.....the Project Manager's compensation.

Please consider the above information and note that the Notice to Proceed for construction was January 4, 2022. Preconstruction services commenced in September of 2020 and concluded in December 2021, Pre-construction services durations were 16 months and not the four or five months as set forth in Article 1.3.7 of our agreement. This time did include an exercise of value engineering and re-bidding the project. Construction started in January of 2022 and has an anticipated duration of 25 months.

As stated above, protracted pre-construction services has resulted in BurWil requesting additional pre-construction services. Our proposed Services, Exhibit C of the aforementioned project manager agreement, identified \$75,000 for four or five months of pre-construction, or approximately \$15,000 per month (\$75,000/5). The equation therefore would result as follows; an additional nine months of pre-construction services at \$15,000/month would equal \$135,000.00. However, BurWil would agree and request that the agreement be amended to reflect only an additional \$95,000.00 for additional compensation for the pre-construction services.

Also, please refer to Article 1.4.5 which identifies Michael Scott as a representative of BurWil. Mr. Scott is no longer an employee of BurWil. Therefore, we would request that as part of this change request, we modify this article to remove Mr. Scott's name and add Jaron Dowalter, project manager as representative in his place. Please find Mr. Dowalter's resume attached to this change request.

Herein is the summary for the Change Request:

Original negotiated total for the agreement	\$ 975,000
Additional Pre-Construction Services for 9 months	\$ 95,000
Total Project Agreement including this request	\$1,070,000

If the above change request is acceptable, and upon approval and agreement with you, BurWil will prepare a change amendment to the agreement, inclusive of including Mr. Dowalter's information as an additional representative. If you have any questions or comments, please do not hesitate to contact us.

Very Truly Yours,

#### ARTICLE 1 GENERAL PROVISIONS

#### § 1.1 Governing Law, including the Uniform Commercial Code

This Agreement is for the sale of goods, specifically furniture, furnishings, and equipment (FF&E), and shall be governed by the law of the place where the Project is located, excluding that jurisdiction's choice of law rule and including the jurisdiction's Uniform Commercial Code (UCC) as adopted. If this Agreement conflicts with terms provided by the UCC, the Agreement shall prevail. If the parties have selected arbitration as the method of binding dispute resolution, the Federal Arbitration Act shall govern Section 14.7.

#### § 1.2 The Contract Documents

The Contract Documents are enumerated in Article 15 and consist of this Agreement (including, if applicable, Supplementary and other Conditions of the Contract), Drawings, Specifications, Addenda issued prior to the execution of this Agreement, other documents listed in this Agreement, and Modifications issued after execution of this Agreement. The intent of the Contract Documents is to include all items necessary for the proper execution and completion of the Work by the Vendor. The Contract Documents are complementary, and what is required by one shall be as binding as if required by all. Performance by the Vendor shall be required to the extent consistent with the Contract Documents and reasonably inferable from them as being necessary to produce the indicated results.

#### § 1.3 The Contract

The Contract Documents form the Contract for the Work. The Contract represents the entire and integrated agreement between the parties hereto and supersedes all prior proposals, offers, terms and conditions, negotiations, representations, or agreements, either written or oral. The Contract may be amended or modified only by a Modification. The Contract Documents shall not be construed to create a contractual relationship of any kind between any persons or entities other than the Owner and the Vendor. The primary purpose of the Contract is the sale of goods, and any services provided are incidental to such primary purpose.

#### § 1.4 Modifications

A Modification is a written amendment to the Contract for changes in the Work signed by both parties or a written order for a minor change in the Work signed by the Architect. A minor change in the Work is a change that is consistent with the intent of the Contract Documents and does not involve an adjustment in the Contract Sum or an extension of the Contract Time.

#### § 1.5 The Work

The Work means the Vendor's performance, including the sale of FF&E and any incidental fabrication, shipping, warehousing, delivery, installation, and other items or services required by the Contract Documents and provided, or to be provided, by the Vendor. The Work includes all labor, materials, temporary protection, storage, and equipment necessary to fulfill the Vendor's obligations, except as specifically indicated in the Contract Documents to be the responsibility of others. The Work may constitute the whole or a part of the Project.

#### § 1.6 Instruments of Service

Instruments of Service are representations, in any medium of expression now known or later developed, of the tangible and intangible creative work performed by the Architect and the Architect's consultants under their respective professional services agreements. Instruments of Service may include, without limitation, studies, surveys, models, sketches, drawings, specifications, and other similar materials.

#### § 1.7 Ownership and Use of Drawings, Specifications, and Other Instruments of Service

§ 1.7.1 The Architect and the Architect's consultants shall be deemed the authors and owners of their respective Instruments of Service, including the Drawings and Specifications, and will retain all common law, statutory, and other reserved rights in their Instruments of Service, including copyrights. The Vendor, sub-vendors, and suppliers shall not own or claim a copyright in the Instruments of Service. Submittal or distribution to meet official regulatory requirements or for other purposes in connection with the Project is not to be construed as publication in derogation of the Architect's or Architect's consultants' reserved rights.

§ 1.7.2 The Vendor, sub-vendors, and suppliers are authorized to use and reproduce the Instruments of Service provided to them, subject to the protocols established pursuant to Sections 1.8 and 1.9, solely and exclusively for execution of the Work. All copies made under this authorization shall bear the copyright notice, if any, shown on the Instruments of Service. The Vendor, sub-vendors, and suppliers may not use the Instruments of Service on other projects, or in connection with additions to this Project outside the scope of the Work without the specific written consent of the Owner, Architect, and the Architect's consultants.

#### § 1.8 Digital Data Use and Transmission

The parties shall agree upon protocols governing the transmission and use of Instruments of Service or any other information or documentation in digital form. The parties will use AIA Document E203<sup>TM</sup>\_2013, Building Information Modeling and Digital Data Exhibit, to establish the protocols for the development, use, transmission, and exchange of digital data.

#### § 1.9 Building Information Models Use and Reliance

Any use of, or reliance on, all or a portion of a building information model without agreement to protocols governing the use of, and reliance on, the information contained in the model and without having those protocols set forth in AIA Document E203<sup>TM</sup>–2013, Building Information Modeling and Digital Data Exhibit, and the requisite AIA Document G202<sup>TM</sup>–2013, Project Building Information Modeling Protocol Form, shall be at the using or relying party's sole risk and without liability to the other party and its vendors or consultants, the authors of, or contributors to, the building information model, and each of their agents and employees.

#### § 1.10 Severability

The invalidity of any provision of the Contract Documents shall not invalidate the Contract or its remaining provisions. If it is determined that any provision of the Contract Documents violates any law, or is otherwise invalid or unenforceable, then that provision shall be revised to the extent necessary to make that provision legal and enforceable. In such case the Contract Documents shall be construed, to the fullest extent permitted by law, to give effect to the parties' intentions and purposes in executing the Contract.

#### § 1.11 Notice

§ 1.11.1 Except as otherwise provided in Section 1.11.2, where the Contract Documents require one party to notify or give notice to the other party, such notice shall be provided in writing to the designated representative of the party to

whom the notice is addressed and shall be deemed to have been duly served if delivered in person, by mail, by courier, or by electronic transmission in accordance with AIA Document E203<sup>TM</sup>–2013, Building Information Modeling and Digital Data Exhibit, if completed, or as otherwise set forth below:

(If other than in accordance with AIA Document E203–2013, insert requirements for delivering Notice in electronic format such as name, title, and email address of the recipient and whether and how the system will be required to generate a read receipt for the transmission.)

« »

§ 1.11.2 Notice of Claims shall be provided in writing and shall be deemed to have been duly served only if delivered to the designated representative of the party to whom the notice is addressed by certified or registered mail, or by courier providing proof of delivery.

#### § 1.12 Assignment of Contract

Neither party to the Contract shall assign the Contract without written consent of the other, except that the Owner may, without consent of the Vendor, assign the Contract to a lender providing financing for the Project if the lender assumes the Owner's rights and obligations under the Contract Documents. The Vendor shall execute all consents reasonably required to facilitate such assignment.

#### ARTICLE 2 CONTRACT SUM AND PAYMENTS

§ 2.1 Contract Sum

§ 2.1.1 The Owner shall pay the Vendor the Contract Sum in current funds for the Vendor's performance of the Contract. The Contract Sum shall be «SEVENTY THOUSAND EIGHT HUNDRED AND THIRTY FOUR DOLLARS AND 60/100 » (\$ «70,834.60 » ), subject to additions and deductions as provided in the Contract Documents.

#### ARTICLE 3 TIME

#### § 3.1 Contract Time

- § 3.1.1 Unless otherwise provided, Contract Time is the period of time, including authorized adjustments, allotted in the Contract Documents for completion of the Work. The Contract Time shall be measured from the date of commencement. The term "day" as used in the Contract Documents shall mean calendar day unless otherwise specifically defined.
- § 3.1.2 Time limits stated in the Contract Documents are of the essence of the Contract. By executing this Agreement, the Vendor confirms that the Contract Time is a reasonable period for performing the Work.
- § 3.1.3 If the Vendor is delayed at any time in the commencement or progress of the Work by (1) changes ordered in the Work; (2) labor disputes, fire, unusual delay in deliveries, abnormal adverse weather conditions not reasonably anticipatable, unavoidable casualties, or any causes beyond the Vendor's control; or (3) other causes that the Vendor asserts, and the Architect determines, justify delay, then the Contract Time shall be extended for such reasonable time as the Architect may determine, subject to the provisions of Article 14.

Such obligation shall not be construed to negate, abridge, or reduce other rights or obligations of indemnity which would otherwise exist as to a party or person described in this Section 5.14.1.

- § 5.14.2 In claims against any person or entity indemnified under Section 5.14.1 by an employee of the Vendor, a subvendor, anyone directly or indirectly employed by them, or anyone for whose acts they may be liable, the indemnification obligation under Section 5.14.1 shall not be limited by a limitation on amount or type of damages, compensation, or benefits payable by or for the Vendor or sub-vendor under workers' compensation acts, disability benefit acts, or other employee benefit acts.
- § 5.14.3 Provided the Owner has fulfilled its payment obligations under the Contract Documents, the Vendor shall defend and indemnify the Owner from all loss, liability, damage or expense, including reasonable attorney's fees and litigation expenses, arising out of any lien claim or other claim for payment by any sub-vendor or supplier of any tier. Upon receipt of notice of a lien claim or other claim for payment, the Owner shall notify the Vendor. If approved by the applicable court, when required, the Vendor may substitute a surety bond for the property against which the lien or other claim for payment has been asserted.

#### ARTICLE 8 ACCEPTANCE

- § 8.1 The Owner and Architect may conduct a preliminary inspection of FF&E within seven days after its delivery to the Project premises for the purpose of verifying the delivery and quantities. Preliminary inspections shall not constitute acceptance of, taking charge over, or taking control of, such FF&E. The Architect shall report to the Vendor any defects, damage, deficiencies, or nonconformity observed during the preliminary inspection.
- § 8.2 When the Vendor considers the Work, or a portion thereof which the Owner agrees to accept separately, to be complete, the Vendor shall notify the Owner and Architect. The Vendor shall allow the Owner and Architect a reasonable amount of time to inspect the FF&E to determine, based on conformance with the Contract Documents, if it is accepted or rejected in whole or in part. Based on the Architect's recommendation to the Owner and the Owner's own inspection, if any, the Owner shall accept or reject the FF&E, in whole or in part.
- § 8.3 If the Owner rejects any of the FF&E, the Owner, or the Architect acting on behalf of the Owner, shall notify the Vendor within seven days of the date of inspection, specifying the basis for such rejection. Upon rejection, the Vendor shall provide a remedy and evidence of arrangements to accomplish such remedy. The Owner shall allow the Vendor a reasonable amount of time to remedy the rejected FF&E. When the Vendor considers the remedied FF&E to be complete, the parties shall follow the procedures set forth in Section 8.2. If the Owner rejects any of the FF&E for a second time, the Owner shall promptly notify the Vendor and the Vendor shall promptly remove the rejected FF&E from the Project premises and refund payments made for such rejected goods to the Owner. If the Vendor disagrees with an Owner's rejection, the Vendor may make a claim.
- § 8.4 FF&E not inspected in accordance with Section 8.2 or rejected in accordance with Section 8.3 shall be deemed accepted.
- § 8.5 The Owner's acceptance under this Article 8 cannot be revoked; however, the provisions of this Article 8 do not preclude recovery of damages as provided by law. The Owner's acceptance, or failure to discover a Vendor's breach after acceptance, shall not bar the Owner from making claims in accordance with Article 14 or from remedies and damages due to the Vendor's breach of this Agreement, including the Vendor's breach of warranties in Article 9.

#### ARTICLE 9 WARRANTIES

- § 9.1 The Vendor warrants to the Owner that the FF&E furnished under the Contract will be of good quality and new unless the Contract Documents require or permit otherwise. The Vendor further warrants that the FF&E will conform to the requirements of the Contract Documents. FF&E not conforming to these requirements may be considered defective. The Vendor's warranty excludes remedy for damage or defect caused by abuse, alterations to the FF&E not executed by the Vendor, improper or insufficient maintenance, improper operation, or normal wear and tear and normal usage.
- § 9.2 The Vendor assigns to the Owner all FF&E manufacturers' warranties and guarantees upon acceptance in accordance with Article 8.

- § 10.4 The Architect will visit the Project premises at intervals appropriate to the stage of the Work, or as otherwise agreed with the Owner, to become generally familiar with, and to keep the Owner informed about, the progress and quality of the portion of the Work completed, and to determine, in general, if the Work observed is being performed in a manner indicating that the Work, when fully completed, will be in accordance with the Contract Documents. The Architect will not have control over, charge of, or responsibility for, the means, methods, techniques, sequences, or procedures of fabrication, shipment, delivery, storage, or installation, or for the safety precautions and programs in connection with the Work, as these are solely the Vendor's rights and responsibilities under the Contract Documents.
- § 10.5 The Architect may order minor changes in the Work. The Architect's order for minor changes shall be in writing. If the Vendor believes that the proposed minor change in the Work will affect the Contract Sum or Contract Time, the Vendor shall notify the Architect and shall not proceed to implement the change in the Work. - § 10.6 The Architect will conduct inspections of FF&E and provide recommendations as set forth in Article 8. Pursuant to Article 8, the Architect is only responsible for identifying defects, deficiencies, or nonconformities that the Architect actually observes, or reasonably should observe, during its inspections. The Architect is not required to make exhaustive or continuous inspections to fulfill its responsibilities in Article 8 and has no responsibility to discover latent defects.
- § 10.7 The Architect will review and approve or take other appropriate action upon the Vendor's submittals such as shop drawings, product data, and samples, but only for the limited purpose of checking for conformance with information given and the design concept expressed in the Contract Documents.

#### ARTICLE 11 RELATED ACTIVITIES OF OWNER OR OF SEPARATE VENDORS

- § 11.1 The Owner shall coordinate the activities of the Owner's own forces and of each separate vendor or contractor, if any, with the Work.

If the Vendor fails to report reasonably discoverable discrepancies or defects, it shall be responsible for deficiencies or defects in its Work due to such deficiencies or defects.
- § 11.3 The Vendor shall reimburse the Owner for costs the Owner incurs that are payable to a separate vendor or contractor because of the Vendor's delays, improperly timed activities, or damage to the work of a separate vendor or contractor. The Vendor shall promptly remedy damage and loss to property caused in whole or in part by the Vendor, sub-vendors, or anyone directly or indirectly employed by any of them, or by anyone for whose acts they may be liable and for which the Vendor is responsible under Sections 12.1.2 and 12.1.3. The Vendor may make a claim for the cost to remedy the damage or loss to the extent such damage or loss is attributable to acts or omissions of the Owner or Architect, or of anyone for whose acts either of them may be liable, and not attributable to the fault or negligence of the Vendor. The foregoing obligations of the Vendor are in addition to the Vendor's obligations under Section 5.14.

#### § 12.2 Hazardous Materials and Substances

§ 12.2.1 The Vendor is responsible for compliance with the requirements of the Contract Documents regarding hazardous materials or substances. If the Vendor encounters a hazardous material or substance not addressed in the Contract Documents, and if reasonable precautions will be inadequate to prevent foreseeable bodily injury or death to persons resulting from a material or substance, including but not limited to asbestos or polychlorinated biphenyl (PCB), encountered on the Project premises by the Vendor, the Vendor shall, upon recognizing the condition, immediately stop Work in the affected area and notify the Owner and Architect of the condition. When the material or substance has been rendered harmless, Work in the affected area shall resume upon written agreement of the Owner and Vendor. By written agreement between the Owner and Vendor, the Contract Time shall be extended appropriately, and the Contract Sum shall be increased in the amount of the Vendor's reasonable additional costs of shutdown, delay, and start-up.

§ 12.2.2 To the fullest extent permitted by law, the Owner shall indemnify and hold harmless the Vendor, sub-vendors, Architect, Architect's consultants, and agents and employees of any of them from and against claims, damages, losses, and expenses, including but not limited to attorneys' fees, arising out of or resulting from performance of the Work in the affected area, if in fact, the material or substance presents the risk of bodily injury or death as described in Section 12.2.1 and has not been rendered harmless, provided that such claim, damage, loss, or expense is attributable to bodily injury, sickness, disease or death, or to injury to or destruction of tangible property (other than the Work itself), except to the extent that such damage, loss, or expense is due to the fault or negligence of the party seeking indemnity.

§ 12.2.3 If, without negligence on the part of the Vendor, the Vendor is held liable by a government agency for the cost of remediation of a hazardous material or substance solely by reason of performing Work as required by the Contract Documents, the Owner shall indemnify the Vendor for all cost and expense thereby incurred.

#### § 13.13 Waiver of Subrogation

§ 13.13.1 The Owner and Vendor waive all rights against (1) each other and any of their sub-vendors, agents, and employees, each of the other; (2) the Architect and Architect's consultants; and (3) separate vendors or contractors, if any, and any of their sub-vendors, subcontractors, sub-subcontractors, agents, and employees, for damages caused by fire, or other causes of loss, to the extent those losses are covered by property insurance required by this Agreement or other property insurance applicable to the Project, except such rights as they have to proceeds of such insurance. The Owner or Vendor, as appropriate, shall require similar written waivers in favor of the individuals and entities identified above from the Architect, Architect's consultants, separate vendors and contractors, and sub-vendors, subcontractors, and sub-subcontractors. The policies of insurance purchased and maintained by each person or entity agreeing to waive claims pursuant to this Section 13.13.1 shall not prohibit this waiver of subrogation. This waiver of subrogation shall be effective as to a person or entity (1) even though that person or entity would otherwise have a duty of indemnification, contractual, or otherwise, (2) even though that person or entity did not pay the insurance premium directly or indirectly, or (3) whether or not the person or entity had an insurable interest in the damaged property.

§ 13.13.2 A loss insured under the Owner's property insurance shall be adjusted by the Owner as fiduciary and made payable to the Owner as fiduciary for the insureds, as their interests may appear, subject to requirements of any applicable mortgagee clause. The Owner shall pay the Architect and Vendor their just shares of insurance proceeds received by the Owner, and by appropriate agreements, written where legally required for validity, the Architect and Vendor shall make payments to their consultants and sub-vendors in similar manner.

#### ARTICLE 14 CLAIMS AND DISPUTES

#### § 14.1 Binding Dispute Resolution

For any claim subject to, but not resolved by, mediation pursuant to Section 14.6, the method of binding dispute resolution shall be as follows:

(Check the appropriate box.)

[ « » ] Arbitration pursuant to Section 14.7 of this Agreement

[ «X » ] Litigation in a court of competent jurisdiction

[ « » ] Other (Specify)

« »

If the Owner and Vendor do not select a method of binding dispute resolution, or do not subsequently agree in writing to a binding dispute resolution method other than litigation, claims will be resolved in a court of competent jurisdiction.

§ 14.2 Claims, disputes, and other matters in question arising out of or relating to this Contract, including those alleging an error or omission by the Architect but excluding those arising under Section 12.2, shall be referred initially to the Architect for decision. Such matters, except those waived as provided for in Section 14.12, shall, after initial decision by the Architect or 30 days after submission of the matter to the Architect, be subject to mediation as a condition precedent to binding dispute resolution.

#### § 14.3 Notice of Claims

Claims by either the Owner or Vendor shall be initiated by notice to the other party in accordance with Section 1.11.2.

#### § 14.4 Time Limits on Claims

The Owner and Vendor shall commence all claims and causes of action against the other and arising out of or related to the Contract in accordance with the requirements of the final dispute resolution method selected in this Agreement, whether in contract, tort, breach of warranty, or otherwise, within the period specified by applicable law, but in any case not more than 10 years after the date of completion of the Work. The Owner and Vendor waive all claims and causes of action not commenced in accordance with this Section 14.4.

- § 14.5 If a claim, dispute, or other matter in question relates to or is the subject of a mechanic's lien, the party asserting such matter may proceed in accordance with applicable law to comply with the lien procedures, including notice or filing deadlines.
- § 14.6 The parties shall endeavor to resolve their disputes by mediation which, unless the parties mutually agree otherwise, shall be administered by the American Arbitration Association in accordance with their Construction Industry Mediation Procedures in effect on the date of this Agreement. A request for mediation shall be made in writing, delivered to the other party to this Agreement, and filed with the person or entity administering the mediation. The request may be made concurrently with the binding dispute resolution proceedings but, in such event, mediation shall proceed in advance of binding dispute resolution proceedings, which shall be stayed pending mediation for a period of 60 days from the date of filing, unless stayed for a longer period by agreement of the parties or court order. If an arbitration is stayed pursuant to this Section, the parties may nonetheless proceed to the selection of the arbitrator(s) and agree upon a schedule for later proceedings.
- § 14.7 If the parties have selected arbitration as the method for binding dispute resolution in this Agreement, any claim, subject to, but not resolved by, mediation shall be subject to arbitration which, unless the parties mutually agree otherwise, shall be administered by the American Arbitration Association, in accordance with the Construction Industry Arbitration Rules in effect on the date of this Agreement. Demand for arbitration shall be made in writing, delivered to the other party to the Contract, and filed with the person or entity administering the arbitration. The award rendered by the arbitrator or arbitrators shall be final, and judgment may be entered upon it in accordance with applicable law in any court having jurisdiction thereof.
- § 14.8 Subject to the rules of the American Arbitration Association or other applicable arbitration rules, either party, at its sole discretion, may consolidate an arbitration conducted under this Agreement with any other arbitration to which it is a party provided that (1) the arbitration agreement governing the other arbitration permits consolidation; (2) the arbitrations to be consolidated substantially involve common questions of law or fact; and (3) the arbitrations employ materially similar procedural rules and methods for selecting arbitrator(s).
- § 14.9 Subject to the rules of the American Arbitration Association or other applicable arbitration rules, any party to an arbitration may include by joinder persons or entities substantially involved in a common question of law or fact whose presence is required if complete relief is to be accorded in arbitration provided that the party sought to be joined consents in writing to such joinder. Consent to arbitration involving an additional person or entity shall not constitute consent to arbitration of a Claim not described in the written Consent.
- § 14.10 The foregoing agreement to arbitrate and other agreements to arbitrate with an additional person or entity duly consented to by parties to this Agreement shall be specifically enforceable under applicable law in any court having iurisdiction thereof.

#### § 14.11 Continuing Contract Performance

Pending final resolution of a Claim, except as otherwise agreed in writing, the Vendor shall proceed diligently with performance of the Contract and the Owner shall continue to make payments in accordance with the Contract Documents.

#### § 14.12 Waiver of Claims for Consequential Damages

The Vendor and Owner waive claims against each other for consequential damages arising out of or relating to this Contract. This mutual waiver includes

- damages incurred by the Owner for rental expenses, for losses of use, income, profit, financing, business and reputation, and for loss of management or employee productivity or of the services of such persons; and
- .2 damages incurred by the Vendor for principal office expenses including the compensation of personnel stationed there, for losses of financing, business, and reputation, and for loss of profit except anticipated profit arising directly from the Work.

This mutual waiver is applicable, without limitation, to all consequential damages. Nothing contained in this Section 14.12 shall be deemed to preclude an assessment of liquidated damages, when applicable, in accordance with the requirements of the Contract Documents.

## EconoWash Top-Load Washers AFFORDABLE EFFICIENCY

#### **DURABILITY**

The EconoWash topload is constructed for unmatched longevity. It features a durable stainless steel washtub that won't corrode, chip or pit; a scratch-resistant, hard-baked porcelain enamel top and lid; a heavyduty, two-speed motor; a porcelain-coated steel outer drain tub that resists mold and mildew; and a transmission with only six moving parts for less maintenance and wear – all wrapped up in a rugged galvanized steel base and cabinet!

#### **ENERGY EFFICIENCY & HIGH SPIN SPEED**

While most toploads consume 40 gallons of water per load, the EconoWash topload is engineered with a water saving feature that uses just 27.3 gallons per load. By using less water, laundries significantly cut hot water consumption—saving energy and lowering utility costs. Moreover, the washer delivers 710 RPM spin speeds to remove more water from every load. In doing so, laundries enjoy reduced dry time, boosted productivity and lower utility costs. The EconoWash topload offers superior energy efficiency. At start-up the machine draws fewer amps—conserving additional electricity. Moreover, EconoWash Washers conform to the Department of Energy (DOE) 2013 efficiency standards.

#### QUALITY OF THE WASH

Superior engineering means laundry gets cleaner. The EconoWash topload features a curved, four-vane polypropylene agitator with a 210 degree agitator stroke—the longest in the industry. The machine's lengthy stroke delivers increased wash action for superb wash results.

#### AUTOMATIC BALANCE SYSTEM

Designed to automatically adjust out-of-balance loads, EconoWash completes wash cycles quietly, smoothly and without interruption. A rugged suspension system features six "V" mounted springs to eliminate interrupted wash cycles and out-of-balance loads. It works to reduce vibrations and noise, minimizes machine wear and tear and eliminates the need for an out-of-balance switch.

#### USER-FRIENDLY MDC CONTROL

EconoWash touts a highly flexible electronic control offering customers multiple wash options and ease of use. Available in single coin drop, dual coin drop, token (or variable currency) drop, and pulse start options, the control allows users to select from normal, permanent press, delicate, or one of three energy-saving cycle options; and three water temperatures – hot, warm and cold. In keeping with efficiency, the control automatically uses cold water as its default. Keeping operators informed, an LED display illuminates remaining cycle time. Operators simply load, make selections and press start.

#### **PROGRAMMABILITY**

EconoWash owners enjoy greater features than ever before. Not only does the electronic control offer cycle auditing, testing diagnostics and error code capabilities, it allows programmability of extended cycle times, two agitation and spin speeds, and disabling of hot fills and spray rinses. In doing so, laundries can improve efficiency and wash action to fit their own unique needs.

#### **DISTRIBUTED BY:**

# E-Series

High-Performance Washer-Extractors for On-Premise Laundries

**Maximizing Energy Efficiency** & Productivity.

# E-Series High-Performance Washer-Extractors

Engineered for installation flexibility and longstanding performance, E-Series Washers deliver superior productivity and wash quality, using very little energy and water. Backed by a leading industry-warranty, highly programmable E-Series Washers feature built-in, optional laundry management software and disinfection monitoring.

## **Deliver More Using Less**

#### **Lower Utility Costs**

Not only are E-Series Washers stingy on water, they reach high extract speeds up to 405 G-force for more moisture removal. This high-speed extract reduces resulting dry times by up to 50 percent, which cuts the gas consumed to dry a load by more than 33 percent.

#### **Less Linen Loss**

Because linens retain less moisture, exposure to dryer heat and mechanical action is reduced, which helps reduce linen loss and extend linen life.

#### **Greater Productivity**

Thanks to programmable controls and shorter dry times, E-Series Washers greatly improve laundry productivity — reducing labor costs and extending linen life. On average, labor accounts for 60 percent of the laundry's budget. By installing high-extract E-Series Washers, one full time employee can process more pounds of soiled laundry per hour — reducing your laundry cost per pound.

# INTELL CONTROL TO THE CONTROL

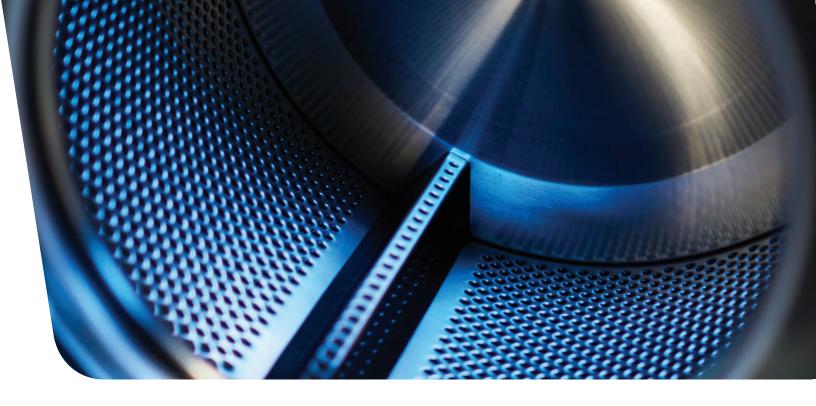

## **Innovative Technology**

#### Inteli Control

Provides up to 99 cycle programs and allows complete control of every conditional aspect of the wash process! An LCD display offers easy-to-understand icons that indicate cycle and programming status. With an unlimited number of phases per program, operators can manually adjust parameters during wash cycle. Versatile and easy to use, the Inteli allows for auto chemical injection, a connection to an external dosing system, adjustable dosing signal length and simultaneous dosing of two products.

#### Logi Control

A highly flexible control available on 30- to 60-pound models, offers eight modifiable programs. With up to nine phases per program, the Logi allows for auto chemical injection and connection to an internal dosing system.

## **Unique Design**

#### **Ease of Maintenance**

Nearly all components are accessible via the front or top cover of the washer, which is easily removed without interfering with detergent dispensers.

#### **Dual Safety Features**

The washer is only active if the closed and locked door signals have been validated.

#### Proven Construction, Durability & Longevity

Backed by an industry-leading factory warranty, E-Series Washers feature inner and outer drums of durable AISI-304 stainless steel, oversized bearings and bearing housings, a quality sealing system, and an oversized door with heavy-duty, bolt-style door hinges.

#### AquaFall® System

As the drum turns, lifters release water from above for better saturation and rinsing using less water and time.

#### AquaMixer® System

By achieving precise bath temperatures, E-Series improves wash action, saves energy, minimizes hot water consumption and reduces wash time.

#### **Smooth Touch**

A system of deep-punched holes, without sharp edges, ensures that the linen is treated delicately.

#### Sump-Less Design

Save up to 3 gallons of water with each fill when compared to machines equipped with an outer tub sump.

#### GDrive

An exclusive management and communication system between the inverter, motor and microprocessor ensures the assembly is properly balanced for a longer life and saves on energy consumption.

#### Zero-Impact Installation

The freestanding design allows E-Series to be easily installed and moved with same day operation. The machine's Multi-Directional Springs system absorbs 95 percent of all vibrations.

#### Sapphire Remote Management System

Optional remote management is built into E-Series Washers. Sapphire greatly facilitates the management of a laundry, reporting irregularities and reducing costs and downtime.

#### Disinfection Monitoring Package (DMP)

The optional, exclusive DMP integrates with the Sapphire Remote Management System to ensure pre-programmed washing parameters and disinfection requirements are met.

Re: Body Scanner Purchase with Opioid Settlement Funds

The Hamblen County Jail wants to purchase a body scanner with some of the funds received from the Endo Pharmaceutical Opioid Settlement. The total cost for the body scanner and five (5) years of additional warranty is \$176,500. We are not required to bid the scanner purchase based on the sole source or proprietary purchase clause located in our purchasing policies and procedures, section III.a.v.

The body scanner will help the jail staff keep drugs and other contraband from being smuggled into the jail. The same body scanner is currently being used in Claiborne and Blount County jails. This machine will be moved to the new jail when it is complete.

May 11, 2022

Capt T Laws Hamblen County SO TN 510 Allison Street Morristown, TN 37814

Dear Capt. Laws,

We the undersigned, hereby affirm that the Intercept Whole Body Contraband Detection Scanner is a product of Tek84, Security Product Line.

The Intercept Scanner is uniquely designed, and the following features are exclusive to the product. There are no other whole body contraband detection systems in marketplace production that can meet these combined specifications.

- 1. **Vertical Scanning** The Intercept Scanner is the only whole-body scanner that uses an X-ray beam that images below the subject's feet to above their head with generator and detector array motioning vertically in tandem, scanning on a horizontal plane to assure accurate proportional imaging, no magnification or distortion, and not requiring the subject to move on a platform or conveyer belt during the imaging process.
- 2. **Small footprint** The Intercept Scanner is the only whole-body scanner that has the ultra-compact 34" x 72" footprint design.
- 3. **Exclusion Zone equal to the device footprint** The Intercept Scanner is the only whole-body scanner that has an exclusion zone equal to the 34" x 72" footprint.
- 4. **Waterproof** The Intercept Scanner is the only whole-body scanner that is proven waterproof up to four inches of height from the ground.
- 5. **Dual Vertical Wall Technology** The Intercept Scanner is the only whole-body scanner with Dual Virtual Wall Technology to assure that the subject is standing in the correct position while being scanned in order to minimize radiation dose as per ANSI/HPS N43.17-2009.
- 6. **Complete Scan Report** The Intercept Scanner is the only whole-body scanner that provides a photo, 3 images, scan#, name, time date stamp, comment, unit name, institution name, JMS #, Operator embedded on jpg for evidentiary purposes.
- 7. **Transportable** The Intercept Scanner is transportable. Because it is not permanently anchored to the floor and has built-in wheels, it can be moved to another location.
- 8. Quick The Intercept Scanner has a 4 second scan time.
- 9. **Integrated Thermal Scanner** The Intercept is the only whole-body scanner with an optional integrated thermal scanner with embedded record keeping.

Tek84 is the only manufacturer of the Intercept and the only manufacturer of a device that combines these listed features.

The Intercept has at least four current patents (First patent # 10481295).

The Intercept Whole Body Contraband Detection System routinely utilizes a low imaging dose of 0.25 uSv per scan that adheres to the ALARA (As Low As Reasonably Achievable) Concept outlined in the American National Standard (ANSI/HPS) Regulations N43.17-2009.

Tek84 Engineering products are 100% developed and assembled in the USA.

Sincerely,

Kent Smart Vice President Domestic Sales 925-548-4550
